

HomeKinect Instructions

After booking your appointment, and prior to being treated, you must first complete a consultation with a state medical professional. In order to maintain strict adherence to Texas Medical Board Rule 193.17, we have streamlined this process to make this evaluation more efficient for you.

You will do this in the comfort of your own home with your smartphone device, prior to your scheduled appointment in our office. It will only take 5-8 minutes. Your approved evaluation is valid for one year from the date of consult and must be renewed annually.

1. Download the SpaKinect app on your device
2. Enter First Name, Last Name and DOB where prompted
3. For Desired Treatments: Click on the section itself and then select the first option, HomeKinect
4. Accept all by checking off the two consent boxes at the bottom.
5. Press NEXT
6. You will enter the waiting room where a provider will connect with you within minutes.

If you do not have a smartphone device, or wish to complete this step in our office from our devices, please let us know so we can simply allot extra time during your appointment.

Please don't hesitate to reach out via email at angie@faceforward.info or call us at 512.766.9396 with any questions about this process.
